Instructions for Form FTB 3580

Application to Amortize Certified Pollution Control Facility

References in these instructions are to the Internal Revenue Code (IRC) as of **January 1, 1998**, and to the California Revenue and Taxation Code (R&TC).

General Information

A Purpose

Use form FTB 3580 to request certification of a pollution control facility placed in service in California, and to elect to amortize the basis over a period of 60 months. This election is in accordance with the provisions of IRC Section 169 and R&TC Sections 17250(e) and 24372.3. The amortizable basis for this purpose may be limited. See definition of amortizable basis below.

The amortization deduction, if elected, is in lieu of depreciation otherwise allowable with respect to the certified pollution control facility.

B Definitions

Amortizable basis is that portion of the adjusted basis (for determining gain) of a certified pollution control facility that may be amortized. **Adjusted basis** includes the cost of purchase and installation or, if the facility is fabricated by you, the cost of labor and materials.

If the facility has a useful life of more than 15 years, you must reduce the adjusted basis of the facility to an amount that is in the same ratio as 15 years is to the facility's total years of useful life.

For example: If the adjusted basis of the facility is \$500,000 and its useful life is 20 years, then compute the amortizable basis as follows:

$$\$500,000 \times \frac{15}{20} = \$375,000$$

The remaining adjusted basis of \$125,000 (\$500,000 less \$375,000) may be depreciated over the useful life of the facility.

You may not increase the basis elected to be amortized by the cost of additions or improvements after the amortization period begins.

Certified pollution control facility is a new identifiable treatment facility located in California and used, in connection with a plant or other property in operation before January 1, 1976, to abate or control water or atmospheric pollution or contamination by removing, altering, disposing, storing, or preventing the creation or emission of pollutants, contaminants, wastes, or heat.

It must not significantly:

- Increase the output or capacity, extend the useful life, or reduce the total operating costs of such plant or other property; or
- Alter the nature of the manufacturing or production process or facility.

The State Air Resources Board (air pollution) or the State Water Resources Control Board (water pollution) must certify that the pollution control facility is in conformity with the state program or requirements for abatement or control of water, or atmospheric pollution or contamination.

New identifiable treatment facility includes only tangible property (not including a building and its structural components, other than a building that is exclusively a

treatment facility) subject to an allowance for depreciation as provided in IRC Section 167. It must be identifiable as a treatment facility, and must meet one of the following two conditions:

1. You must have completed construction, reconstruction, or erection of the property after December 31, 1968. However, if the treatment facility is used in connection with any plant or other property not in operation before January 1, 1969, you must have completed the construction, reconstruction, or erection of the treatment facility property after December 31, 1975; or
2. You must have acquired the property after December 31, 1968, if the original use of the property begins with you.

Original use means the first use to which the property is put, regardless of whether the use corresponds to your use of the property.

C Amortization Period

At your election, the 60-month amortization period begins with the month following the month, or with the year following the year, in which you completed or acquired the facility.

D Election and Certification

Make the election to amortize the amortizable basis of a certified pollution control facility by completing Part I and Part II of form FTB 3580. Then apply for certification as follows:

Air pollution. If this election applies to air pollution, you must apply for certification from the State Air Resources Board. Mail three copies of the completed form FTB 3580 to:

STATIONARY SOURCE DIVISION
ATTN DIVISION CHIEF
STATE AIR RESOURCES BOARD
PO BOX 2815
SACRAMENTO CA 95812-2815

The State Air Resources Board will add its certification to Part III if the facility meets the requirements of the R&TC. The Board will return the original and one copy of form FTB 3580 to you. Attach the original to the first return filed with the Franchise Tax Board (FTB) on which you take the amortization. Keep the copy for your records.

Water pollution. If this election applies to water pollution, you must apply for certification from the State Water Resources Control Board. Mail three copies of the completed form FTB 3580 to:

STATE WATER RESOURCES CONTROL BOARD
PO BOX 100
SACRAMENTO CA 95812-0100

The State Water Resources Control Board will add its certification to Part IV if the facility meets the requirements of the R&TC. The Board will return the original and one copy of form FTB 3580 to you. Attach the original to the first return filed with the FTB on which you take the amortization. Keep the copy for your records.
